Reduce Turf Damage with ProGator™ Tires

At John Deere, we're committed to providing hardworking, long-lasting parts for your operation. That's why we created three new **ProGator tire options**. These new tires help to reduce turf damage, while increasing performance in sprayer and topdresser applications. Available on JDParts.com and through John Deere Golf dealers.

New tire options include:

- Smooth front steering tires (22 x 9.50-12) – Reduces turf damage. (Traction in some conditions will be limited.)
- Smooth rear drive tires (26 x 14.00-12) – Offer wider footprint where least amount of turf damage is required, such as sprayer applications on the greens. (Traction in some conditions will be limited.)
- Fairway rear drive tires (26 x 14.00-12) – Offer wide footprint with minimal turf damage where sprayers and topdressers are used.
- Multi-Trac rear drive tires (26 x 14.00-12) – Provide wider footprint and increased load-carrying capacity when using sprayers and topdressers. Use when additional traction is required. (Not pictured.)

Available on JDParts.com and through John Deere Golf dealers.

Part numbers:

- BTC10095* (smooth front steering)
- BTC10096* (smooth rear drive)
- BTC10097* (fairway rear drive)
- BM20705 (multi-trac rear drive)

*Denotes product kits that include two tires and two wheels, mounted.

Quality parts. Real solutions. Only from John Deere.
