# G-SERIES 6WD MOTOR GRADERS

### TAKES A FORWARD LEAP.

Inspired by the best ideas of customers like you, John Deere motor graders are known for their exceptional control and effortless grading precision. And now, we've made some additions to our list of featured firsts. Along with Customer Advocate Group-tested dual-joystick controls, wide-ranging grade-control system options including integrated SmartGrade models, and a number of industry-exclusive automation updates, it's just one more example of innovations we've accelerated to help your operation jump to the next level.

### WHEN YOU ASK, WE LISTEN: THE 622GP GRADER.

Our competitively priced 622GP offers contractors, townships, and municipalities the grader they've been asking for. With just the right amount of power and fuel savings of up to 10 percent over our larger models, it's equipped — not stripped — to include many of the same features found on its larger siblings, including a superior cooling package and ground-level service.

### DO YOUR LEVEL BEST.

### BETTER SPECS, MORE OPTIONS HELP IMPROVE YOUR GRADES

With their exceptional balance, improved performance specs, and more maximum capability, GP-Series Graders are always right on the money, especially for contractors, counties/municipalities, or land-leveling applications.

#### Innovation in action

New John Deere automation features designed to move you ahead in a big way include Machine-Damage Avoidance, Machine Presets, Auto-Articulation, Auto-Gain for Cross Slope, and Auto-Pass (see page 6 for all the details).

#### Move ahead

Auto-Shift PLUS provides simplified machine operation without using the inching pedal.

### More horsepower and torque

Increased engine horsepower, torque, and blade pull produce generous power and lugging ability, to deliver more power to the ground, easily pull through tough spots, or tackle steep hills.

### Power for the job

GP-Series Graders deliver the right amount of power, right when you need it. Horsepower and torque are optimized for each gear to maximize performance, no matter your application.

### Unlimited grade control

Industry-first John Deere SmartGrade Motor Graders are fully integrated and calibrated from the factory, arriving at your jobsite ready to work. In-cylinder position sensing allows the machine to stay on grade no matter what blade pitch, articulation angle, or circle offset you're running.

### Smarter from day one

Integration of SmartGrade into the cabin and structures helps shield key grade-control components such as wire harnesses and sensors from damage and theft. And without external grade-control components to impede maneuverability, final-grade machines can be involved earlier and more effectively in site development.

#### Six-wheel drive

Equip these six-wheel-drive models with Precision mode for maximum productivity in all soil conditions. Six-wheel drive is adjustable on the fly to meet changing soil conditions.

### **GET OUT AHEAD OF IT**

### THE JOHN DEERE DIFFERENCE.

Set yourself apart from the competition. Because with industry-exclusive Auto-Gain for Cross Slope, Auto-Pass, and Auto-Shift PLUS, it's push-button easy to move ahead. Our automation advantages are also available as field kits that can be unlocked on SmartGrade models.

- Exclusive Auto-Shift PLUS allows operators to work without using the inching pedal.
- 2 Auto-Gain for Cross Slope automatically adjusts gain settings based on ground speed to maximize performance.
- 3 Auto-Articulation allows the operator to increase the maneuverability of coordinated steering and articulation while using only the joystick-steering function to steer and operate other necessary functions without manually articulating the machine.
- Machine-Damage Avoidance eliminates the risk of blade damage to machine structures during any operation, even complex orientations.
- 5 Exclusive **Auto-Pass** makes grading easy by automatically placing the blade on the ground and activating the grade-control system (when equipped) at the start of the pass, then automatically raising and resetting the blade at the end of it.
- 6 Preparing the machine for transport is push-button easy with **Machine Presets.** Stow the blade and ripper, turn on the lights including the hazards, and enable Auto-Shift with one button press, for speedy jobsite transitions.

### Optional premium circle

Featuring a fully sealed bearing and pinion that run smoother and quieter, this industry-leading design reduces operating costs while delivering 40-percent more torque and 15-percent more speed than a traditional circle. Contractors no longer have to compensate for wear in the circle, improving accuracy when using a grade-control system - especially impactful when coupled with the innovative John Deere SmartGrade system. And greasing intervals of only four zerks every 500 hours make the premium circle essentially maintenance free.

### TAKE CONTROL

### WITHOUT LIFTING A FINGER.

Our GP-Series Graders give you more choice of how work gets done. Opt for dual-joystick controls or choose state-of-the-art fingertip armrest controls. Or have the best of both worlds — a field kit allows you to easily swap between the two. And based on customer feedback, all models still have a steering wheel. The choice is yours.

### **Joystick option**

Our dual-joystick option provides intuitive control with minimal hand motion during direction changes and gear shifts. Dual-joystick controls help reduce operator fatigue by eliminating the twisting wrist motion or uncomfortable combinations common to other joystick systems.

### Precise control with less fatigue

Instead of twisting the controller, actuate articulation and circlerotate functions using proportional roller switches.

### Return-to-straight

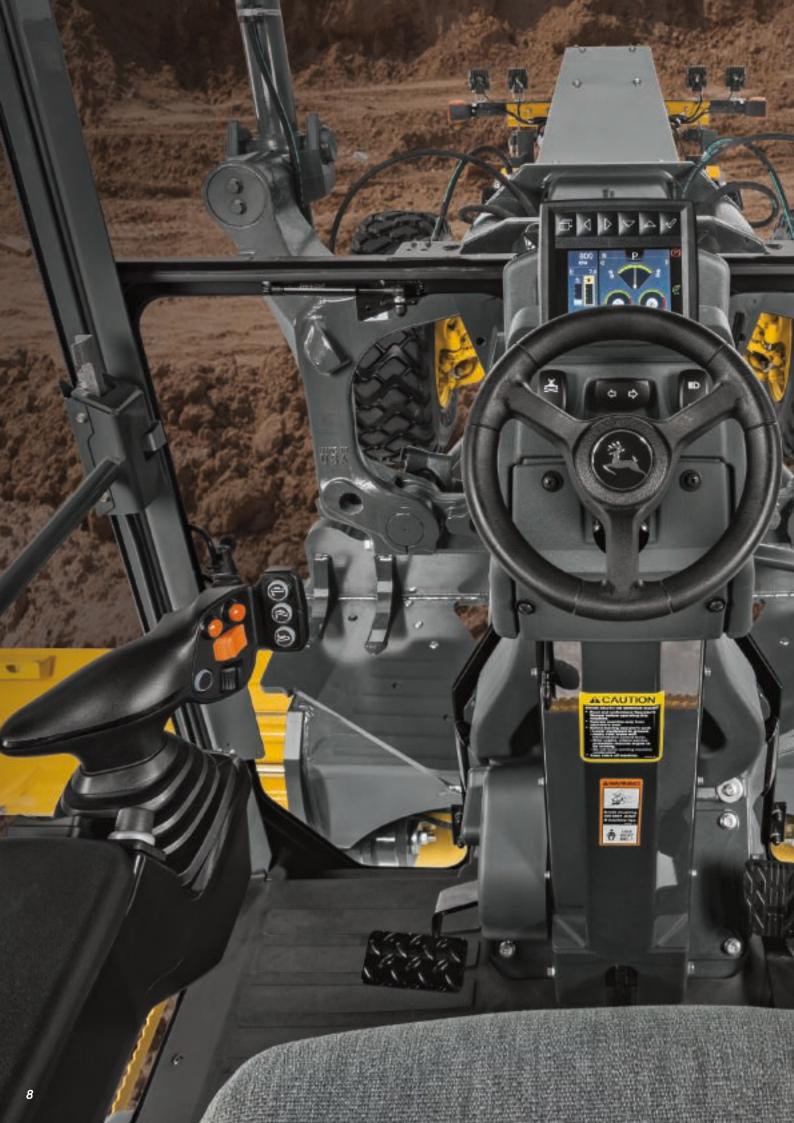

At the touch of a button, return-to-straight automatically straightens an articulated frame, speeding work cycles.

### **Automated cross slope**

Both dual-joystick controls and fingertip armrest controls come equipped with cross slope and are ready to run the grade-control system of your choice. Automated cross slope simplifies holding a consistent slope by reducing operation to a single lever. This feature helps veteran operators be their best and new operators get up to speed more quickly.

- DUAL-JOYSTICK CONTROLS
- FINGERTIP ARMREST MOUNTED
- STEERING WHEEL (STANDARD ON ALL MODELS)

# LOOK FORWARD TO MORE PRODUCTIVITY.

It's easy to see why GP-Series Graders have become a favorite on a wide range of jobsites, with their expansive views, an LCD high-visibility monitor, and smooth gate-less shifting.

### **Exceptional view**

Visibility is virtually unobstructed, with an all-around clear view to the heel and toe, and behind the moldboard. Even the area beneath the front axle is clearly within sight, for greater awareness of oncoming obstacles.

### Store your stuff

Generous storage space includes numerous overhead compartments, plus a place for a beverage, cooler, cell phone, and other carry-ons.

### Lighting the way

Courtesy lighting stays on after machine shutdown and then automatically turns itself off, making it safer to exit the cab after dark, while conserving battery power.

### Easy-access park brake

Sealed-switch module provides push-button control of vital machine functions, including the parking brake, for more convenient access and easier operation.

### Streamlined access to vital info

LCD hi-vis monitor provides intuitive, pushbutton access to vital machine data displayed via simple, easy-to-navigate icons and menus.

### Now you see it

Contractors will benefit from improved visibility to the tandems while working around obstacles such as water mains and hubs.

# UPTIME ISN'T EVERYTHING, IT'S THE ONLY THING.

Downtime means lost productivity and profits. Which is why GP-Series Graders are loaded with durability-enhancing advantages that help deliver years of trouble-free service.

### Fuel-efficient, cool-on-demand fan with reversing option

Variable-speed hydraulically driven fan runs only as fast or as often as necessary to keep things cool. Helps conserve power and fuel, while reducing noise. Standard reversible fan (optional on 622GP) makes for quick core cleanout in high-debris applications.

### Multipurpose for your multipurposes

Redesigned heavy-duty front and rear axles combined with increased maximum operating weights enable more versatility and better blade pull for utilizing attachments.

### Easy-to-clean cooling package

Cooling package eliminates stacked coolers. Combined with the hinged swing-out fan, core access is quick and cleaning is easy.

### Auto shutdown reduces fuel use and wear

Auto shutdown turns off the engine after an operator-determined idle period, saving fuel and reducing wear on engine, transmission, and hydraulic components.

### Save fuel with Eco mode

When engaged, Eco mode reduces engine rpm in gears 1–5, optimizing fuel usage and decreasing operating costs by up to 10 percent.

### Get valuable insight with

### **PRECISION CONSTRUCTION**

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently. In-base JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. Other productivity solutions include grade-management options for multiple machine forms and payload weighing for wheel loaders and articulated dump trucks.

To maximize uptime and lower costs, JDLink also enables John Deere Connected Support.™ John Deere's centralized Machine Health Monitoring Center analyzes data from thousands of connected machines, identifies trends, and develops recommended actions, called Expert Alerts, to help prevent downtime. Dealers use Expert Alerts to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.

# TIME TO TAKE SIDES.

### Fast, simple ground-level access

All daily service points, including fueling and diesel exhaust fluid (DEF), are grouped on the left side for quick and convenient ground-level access. On the right side, maintenance personnel will appreciate the easy-access engine oil, fuel, hydraulic, transmission, and differential filter bank.

### **Connected to customers**

The Wirtgen Group has become known worldwide for technological innovations and machine solutions for the road construction and rehabilitation industries. You can rely on complete customer-focused support for your John Deere equipment from the extensive Wirtgen Group dealer network.

Front Axle	Heavy-duty welded fabrication		
Oscillation (total)	32 deg.		
Wheel Lean Angle (each direction)	20 deg.		
Differentials	Spiral bevel; hydraulically actuated, clutch	type can be applied on-the-go; selecta	able manual or automatic differential lock
Steering (all models include	All-hydraulic power-frame articulation for		
steering wheel)	tandems on firm ground, and increases sid	le-slope stability; automated return-to	o-straight feature
Turning Radius (front steer and articulation)	7.21 m		
Articulation (both right and left)	22 deg.		
Final Drives	Inboard-mounted planetary sealed in coo	oled, filtered oil	
Brakes	Foot-controlled, hydraulically operated, mu systems effective on all 4 tandem wheels	ltiple wet-disc brakes sealed in pressuri	zed, cooled, filtered oil; both independent
Primary and Secondary Brakes			ed and filtered oil, multi-disc (ISO 3450)
i illiary and occordary brakes			

riyuraurics	0/2dF
Туре	Closed-center, pressure-compensated load-sensing (PCLS), variable-displacement piston pump

Maximum Pump Flow 212 L/min.

Maximum System Pressure 18 961 kPa
Pump Displacement 90 cm³

**Blade Function** 

All-hydraulic, industry-standard lever placement of blade-function controls; includes float position; 7 discrete saddle positions

**Blade Range** 

Lift Above Ground 490 mm Blade Side Shift (right or left) 678 mm

Pitch at Ground Line

Forward 42 deg.
Back 5 deg.
Shoulder Reach Outside Wheels (frame straight, right or left)

Bank Cut Angle (right or left)

Blade Pull

At Maximum Operating Weight 22 453 kg

**Electrical** 

Solid-state load center and sealed-switch

module

Voltage 24 volt

Number of Batteries 2

Battery Capacity 1,400 CCA

Reserve Capacity 440 min.

Amp-Hour Rating 224 amp-hour

Alternator Rating 200 amp

**Lights** Driving lights; high- and low-beam LED headlights; front and rear LED turn signals and marker lights; LED brake

and hazard warning lights

90 deg.

Mainframe

Type Welded box construction

Width (minimum) 307 mm Height (minimum) 307 mm

Thickness

Side 16 mm
Top and Bottom Plate 23 mm
Modulus
Minimum Vertical Section 1445 cm³

Average Vertical Section at Saddle

**Draft Frame (drawbar)** 

Welded box construction machined for flatness and double ball-and-socket pivot connection

2245 cm<sup>3</sup>

Circle

Welded construction, heat-treated, and machined for flatness

Standard Circle Premium Circle Circle Diameter 1524 mm 1524 mm 360 deg. 360 deg. Rotation Surface Quick-change bronze or nylon wear inserts Sealed and lubricated roller element slewing bearing Pinion/Ring-Gear Connection Adjustable backlash and open for serviceability No adjustment; fully sealed and lubricated Drive Hydraulic motor and worm gear with positive lock Hydraulic motor and worm gear with positive lock Slip Clutch Option Standard Circle Side Shift (right and left) 787 mm 787 mm

Moldboard

High-strength, pre-stressed for higher strength; wear-resistant, high-carbon steel and reversible end bits; blade side-shift wear system includes quick-change replaceable wear inserts and quick-adjust jackscrew system

Base Length 3.66 m

Height (measured along arc, including cutting edge)

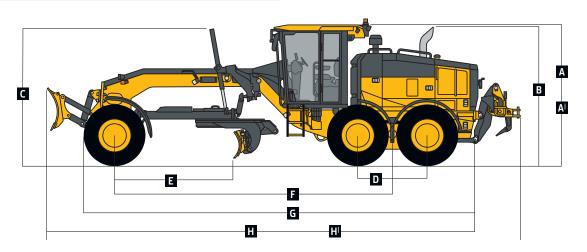

Thickness 22 mm

While general information, pictures, and descriptions are provided, some illustrations and text may include product options and accessories NOT AVAILABLE in all regions, and in some countries products and accessories may require modifications or additions to ensure compliance with the local regulations of those countries.

and accessories MOT AVAILABLE in all regions, and in some countries products and accessories may require modifications or additions to ensure compliance with the local regulations of those countries.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions specified per ISO9249. No derating is required up to 3050-m altitude. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with standard equipment; 14 R24 L2 Radial tires on 254-mm x 610-mm x 101-mm x 22-mm high-strength, wear-resistant moldboards with 16-mm x 152-mm Dura-Max\* through-hardened-steel cutting edges for the 622GP, 672GP, and 772GP; and 17.5 R 25 L2 Radial tires on 356-mm x 635-mm multi-piece rims and 4.27-m x 686-mm x 25-mm high-strength, wear-resistant moldboards with 19-mm x 203-mm Dura-Max through-hardened-steel cutting edges for the 872GP.

Weights include lubricants, coolants, full fuel tanks, and 79-kg operators.

### Take control with more options

Inspired by input from customers like you, John Deere G-Series Motor Graders include a host of innovative options like dual-joystick controls and exclusive automation advantages on Grade Pro (GP) models. Factory-integrated SmartGrade™ configurations. And Precision mode on six-wheel-drive machines. The smaller, more economical 620G and 622G deliver practical power at up to 10-percent fuel savings over their larger siblings. We give you the power of choice to match your application. So you can do your work your way.
